## VACUUM SEALANT TAPE ST210-16

Further Info Available: [www.nzcomposites.com/contactus](http://www.nzcomposites.com/contactus)

ST210-16 is a soft sealant tape compatible with most vacuum bag films and is ideal for use on all tool flanges as a vacuum tight sealant tape to form a seal between the vacuum bagging film and moulding tool surface.

A preformed tape in roll form comes with removal paper backer to keep the tape clean.

The soft nature of ST210-16 easily ensures a flexible vacuum tight seal.  
Easy to implement ST210 is easily removable after cure and doesn't dirty or easily transfer to the tool flanges.

### SEALANT TAPE ST210-16 Specifications:

- Max Operational Temperature 210 C°
- Colour: Yellow
- Thickness 3mm
- Width 13mm
- Roll Length 12.5 meters
- Rolls Per Box: 16
- 200Linear Meters per Box
